Course Information

Brief Description of Course
The Rural & Underserved Utah Training Experience (RUUTE) program is excited for medical students to become more aware of the healthcare needs and experiences of underserved populations in the state of Utah, including refugees, and those living in rural communities throughout Utah. The “Caring for the Underserved: Rural and Refugee Health in Utah” course will help to illuminate the complexity and diversity of the people that reside in Utah, and the challenges and opportunities present in the care of these populations. The course is also designed to inspire future physicians to seek career opportunities within Utah, specifically outside of the Salt Lake City valley. The course will be divided into two halves, one focusing on refugee health and one focusing on rural health.

The course will also help students: 1) identify strengths, deficiencies, and limits in knowledge and expertise as it pertains to the care of underserved populations in Utah; 2) set learning and improvement goals; and 3) identify and perform learning activities that address gaps in knowledge, skills, and/or attitudes.

The medical students who participate in this elective will gain specific insight into healthcare differences within underserved areas and patient populations. Students will gain insight into the realities that many people within underserved communities face on a daily basis and will witness the substantial and distinct healthcare challenges present in these communities.

By taking this class, students should have mastered an overview of the some of the underserved populations in Utah, specifically refugee and rural patients, and the many challenges faced by people who are part of these populations. During the class, students will also come up with some concrete solutions to address the health disparities common to these underserved populations.

Rural Health:

Rural physicians must facilitate many different types of care often with less resources than their urban counterparts, therefore they must develop a broad skillset that covers many different specialties. Furthermore, rural physicians are more likely to hold community leadership roles in the sphere of health and healthcare, thus they must also develop a diverse skillset beyond medical education.

Refugee Health:

Currently, approximately 60,000 refugees reside in Salt Lake City, which has been designated as a refugee resettlement city by the Dept. of State for over fifty years. Approximately 1,000 new refugees arrive in Utah yearly. Persons with refugee status arriving in the United States have multiple barriers to access to health including language and cultural barriers, low level of health literacy prior to arrival in the United States, and financial barriers. Additionally, newly arrived persons with refugee status often face unique health problems that are more uncommon in the Utah population, such as infectious diseases not typically seen in the United States and trauma and torture and associated mental health issues. Taking care of patients with refugee status requires a specific skill set that the students will begin to develop through this course.
By participating in this elective, medical students will examine their own beliefs and implicit bias regarding patients that come from a background different from their own. They will become more culturally sensitive to the socioeconomic determinants of health present within the diverse populations that live in Utah, and with this knowledge and insight, they will hopefully become better future physicians.

Course Goals
As a result of successfully completing the "Caring for the Underserved: Rural and Refugee Health in Utah" elective, students will be able to:

1. Gain an understanding of the challenges and opportunities faced by physicians caring for patients of diverse backgrounds and in resource limited clinical settings.
2. Explain some of the challenges and realities many face when living in a rural/underserved community.
3. Describe the unique aspects of rural population health and compare/contrast to urban/metropolitan population health, including health disparities.
4. Understand the distinct aspects of refugee population health and be able to describe these distinctions while making a comparison to the health of metropolitan populations. Understand and describe the health disparities that affect refugee populations.
5. Show familiarity with common conditions that affect rural and refugee populations, to include: nutrition/dietary health, dental health, emergency health, mental health and substance abuse.
6. Describe how social determinants of health interface with and impact health and health service delivery in rural areas and in refugee care.
7. Be able to find and use relevant data for measuring and discussing the health of rural populations.
8. Gain the skill set to be an empathetic, ethical, communicative, and professional healthcare leader. This includes honing the skill of personal reflection, learning from the experiences of other healthcare providers and colleagues, and being able to communicate with colleagues on issues brought up throughout the elective.

Course Format & Schedule
Timeline: 5/16/2021-7/26/2021

Role of the Student in this Course
- Students will view all assigned video lectures.
- Students will read along with the class, the assigned book, “The Spirit Catches You and You Fall Down.”
- Students will write a reflective essay on the assigned book.
- Students will read the assigned articles and view the online material that coincides with the lecture for the week.
- Students will complete the written assignment comparing and contrasting healthcare problems in Salt Lake City and a community in rural Utah.
- Students will contribute to the online learning forum by posting responses to the lectures and videos as well as posting responses to their colleague’s posts. Students will post original content at least five times throughout the course and respond to at least three of their colleague’s posts.
Students will display the ability to integrate concepts, ideas, and information related to the elective by completing the written assignments as well as interacting with their peers on the student discussion board.

**Topics in this Course**
- Refugee Health
- Native American oral health
- Rural psychiatric medicine
- Rural OB/GYN medicine
- Rural migrant and family medicine
- Rural health from a patient perspective
- Communication skills required of physicians
- Creativity
- Personal reflection

*Topics may vary by availability of guest lecturers

**Educational and Instructional Modalities for this Course**
- Asynchronous weekly lectures uploaded to Canvas. This will be a combination of powerpoint presentations with an audio voiceover as well as video recorded lectures, depending on the lecturer preference.
- Asynchronous readings and video viewing through Canvas
- Peer-to-peer education through online posting in Canvas

**Alignment of Program Objectives and Course Objectives**

Refer to Appendix B to see the alignment between the University of Utah School of Medicine's Program Objectives and the Taking Care of Rural and Underserved Populations Rural Research Elective Course Objectives.

**Required Textbook(s)/Readings**

<table>
<thead>
<tr>

</thead>
</table>

**Book reading schedule:**

Week 1: Chapters 1-4  
Week 2: Chapters 5-8  
Week 3: Chapters 9-12  
Week 4: Chapters 13-15  
Week 5: Chapters 16-19

**Video Lecture Schedule:**

5/16/2021: First five lecture videos will be released  
6/21/2021: Second set of five lecture videos will be released

**Additional Resources**

Refer to Appendix C for various articles and online content that will be posted to the Canvas platform.
### Assessment & Grading

<table>
<thead>
<tr>
<th>Assessment Name</th>
<th>Weight toward Final Grade</th>
<th>Must Pass/Must Complete</th>
<th>Course Goal Assessed</th>
<th>Due Date</th>
</tr>
</thead>
</table>
| Reflective essay                      | N/A                       | Must Pass*              | - Write a reflective piece of 5-7 pages in length on the book “The Spirit Catches You and You Fall Down.” Please address the following questions in your reflection:  
  - What is your definition of cultural competency as it pertains to healthcare?  
  - How did the medical providers in the book display cultural competence or a lack thereof in regards to the care that Lia Lee and her family received?  
  - What role did miscommunication play between the medical providers and the Lee family?  
  - What are times in your medical school experience thus far that miscommunication, oral or written, has impeded either your learning or the care that has been provided to a patient under your care? | 6/21/2021  |
| Viewing of all guest lecturer videos and reading of articles/videos assigned weekly | N/A                       | Must Pass*              | - Gain an understanding of the challenges and opportunities faced by physicians caring for patients of diverse backgrounds and in resource limited clinical settings. | Weekly     |
| Comparative Essay                     | N/A                       | Must Pass*              | - Write a comparative essay of 5-5 pages comparing the health care resources and rates of three common health problems in Salt Lake City and a rural community in Utah, using the rural Utah health database [https://ruralhealth.health.utah.gov/portal/](https://ruralhealth.health.utah.gov/portal/).  
  - Come up with two potential solutions to the health disparities identified through this exercise.  
  - Compare and contrast the different resources available to patients as well as rates of common problems in refugee populations and rural areas of the state in order to display an understanding of the unique health challenges affecting the various zones of Utah.  
  - Explain some of the challenges and realities many face when living in a rural/underserved community. | 7/26/2021  |

</tbody>
</table>
*See Appendix D for Grading Rubric

**Grading Criteria**
Students who participate and complete all the elective discussions, lectures, and assignments will receive a grade of PASS for the elective.

**Grading System**
Students will receive a final letter grade of PASS (P) or FAIL (F) for this course:

**PASS:** A student who successfully completes ALL Must Pass and Must Participate elements for the course will be assigned a grade of PASS.

**FAIL:** A student who fails to achieve a Pass for each Must Pass element or who fails to participate in all Must Participate elements for the course will be assigned a grade of FAIL.
Student Feedback
Student feedback is an important aspect of curriculum quality improvement. Thus, students are expected to complete all assigned feedback surveys specific to a course by the due date.

Standard Policies
Please refer to the Student Handbook (on the Student Affairs’ website) for these policies:
- Accommodations
- Addressing Sexual Misconduct
- Dress Code
- Examination and Grading Policies
- Grade or Score Appeal
- Professionalism, Roles & Responsibilities
- Mistreatment
- Infectious, Environmental and Bloodborne Pathogen Exposures Policy

Alternate Name and/or Personal Pronoun
Class rosters are provided to the instructor with the student’s legal name as well as ‘Preferred’ first name (if previously entered by you in the Student Profile section of your CIS account). While CIS refers to this as merely a preference, we will honor you by referring to you with the name and pronoun that feels best for you in class, on papers, exams, group projects, etc. Please advise us of any name or pronoun changes (and please update CIS) so we can help create a learning environment in which you, your name, and your pronoun will be respected.

Center for Disability & Access Services
The School of Medicine seeks to provide equal access to its programs, services and activities for all medical students. The Center for Disability and Access (CDA) provides accommodations and support for the educational development of medical students with disabilities. Medical students with a documented disability and students seeking to establish the existence of a disability and to request accommodation are required to meet with the CDA Director for recommended accommodations. The CDA will work closely with eligible students and the Academic Success Program to make arrangements for approved accommodations. The School of Medicine and CDA maintain a collegial, cooperative, and collaborative relationship to ensure compliance with federal and state regulations for students with disabilities.

Steven Baumann EdD, School of Medicine Senior Director of Academic Success Program, serves as the liaison between the School of Medicine and the CDA.

Appendix D

Pass/Fail Essay Rubric

A passing assignment does all of the following:

- Addresses the objectives of the assignment
- Demonstrates knowledge of the subject matter relevant to the assignment
- Reflects accurate understanding of concepts, terminology, and key takeaways
- Develops arguments and/or presents information in a coherent, focused manner
- Includes insightful analysis and reflection
- Integrates appropriate evidence, including examples and experiences, to support assertions and support arguments
- Appropriately cites sources of information where appropriate
- Utilizes clear, accurate spelling and grammar
- Is completed on or by the designated due date

A failing assignment does some or all of the following:

- Fails to address the objectives of the assignment
- Demonstrates weak knowledge of the subject matter relevant to the assignment
- Fails to demonstrate understanding of concepts, terminology, and key takeaways
- Shows incoherent, fragmented development of arguments and/or presentation of information
- Includes little analysis and reflection, relying mainly on summary
- Fails to integrate appropriate evidence, including examples and experiences, to support assertions and support arguments
- Fails to cite sources appropriately where appropriate
- Does not utilize clear, accurate spelling and grammar
- Is not completed on or by the designated due date
