Course Information

Brief Description of Course
The Plastic Surgery Sub-Internship is a 4-week immersive course in which students expand their fund of knowledge and clinical skills during a rigorous clinical experience in which patient care responsibilities, workload, and work hours closely parallel those of a resident intern in the specialty.

Course Objectives
As a result of successfully completing Core Sub-Internship in Plastic Surgery, students will have demonstrated the ability to perform each of the following for ambulatory and hospitalized patients presenting with new and follow-up core chief complaints/diagnoses relevant to the clerkship:

1. Perform an accurate complete or focused patient interview and physical exam in a prioritized, organized manner without supervision, with respect for the patient, and tailored to the clinical situation and specific patient encounter. Integrate the scientific foundations of medicine with clinical reasoning skills to guide information gathering (EPA 1a, 1b).
2. Dynamically integrate patient data to formulate an assessment, develop a working diagnosis and prioritized list of alternate potential diagnoses. Avoid common cognitive errors of clinical reasoning (EPA 2).
3. Select and interpret common diagnostic and screening tests using evidence-based and cost-effective principles (EPA 3).
4. Enters accurate, focused, and context-specific documentation of a clinical encounter in either written or electronic formats (EPA 5).
5. Concisely and accurately present a summary of the clinical encounter and synthesis of clinical reasoning to the health care team (including patients and families) to achieve a shared understanding of the patient’s current condition (EPA 6).
6. Apply understanding of roles, responsibilities, and contributions of individual team members to communicate effectively with physician and non-physician members of the team to provide safe, timely, effective, efficient, and equitable patient care (EPA 9).

Successful students will have also:

7. Professionalism: Demonstrated professional responsibility and commitment to ongoing improvements in medical student education through accurate and timely completion of Case and Work Hours Logs as well as the Clinical Activities Form (PCRS P 5.6; UUSOM P 5.4).
8. Practice-Based Learning and Improvement: Employed the Mid-Point Formative Feedback process to reconcile similarities and differences between their self-identified strengths and deficiencies in clinical skills and those identified by their preceptor (PCRS PBLI 3.1; UUSOM PBLI 3.1).
9. Practice-Based Learning and Improvement: Employed the Mid-Point Formative Feedback process to work collaboratively with their preceptor to set learning and improvement goals (PCRS PBLI 3.2; UUSOM PBLI 3.2).

**Please refer to the Clinical Curriculum Procedures and Practices for detailed information on Phase 4 Developmental Benchmarks for Priority EPAs.**
Clinical Course Format & Schedule

Timeline
The Core Sub-Internship in Plastic Surgery is 28 days in duration.

Schedule
The complete calendar and list of objectives for each event/activity can be found on the course’s Canvas site. Canvas can be accessed at: https://utah.instructure.com/

**Please refer to the Clinical Curriculum Procedures and Practices for detailed information on Phase 4 Course Attendance Expectations and Medical Student Clinical and Educational Work Practices.

Role of the Student in this Clinical Course

Sub-Internship students are expected to function at the level of an early resident intern with respect to core responsibilities, patient load, and work hours. For assigned patients, students should conduct and document the initial history and physical examination, retrieve clinical information from the electronic medical record and other sources, present the patient to the supervising resident or preceptor, finalize the admission plans with the supervising resident or preceptor and patient, and discuss admission orders/diagnostic testing/therapy with the resident/preceptor. Each day students should pre-round on their panels of patients (i.e. gather interval history and data, perform focused physical examinations, present the patients during rounds, enter new orders, and construct daily progress notes).

***Please refer to the Clinical Curriculum Procedures and Practices for detailed information on Clinical Curriculum Supervision of Medical Students.

Core Chief Complaints, Core Diagnoses & Clinical Encounter Criteria

During the Core Sub-Internship in Plastic Surgery, students are expected to experience and participate in a variety of clinical encounters with patients. The following table outlines the types of patient encounters expected for each student during the rotation. Students are required to log all of their encounters in the Case Log Application available via Tools. Where noted, alternatives to authentic clinical encounters may be allowed. Each student remains responsible for completion of the patient log; any student with concerns that he/she is in jeopardy of not fulfilling the requisite number of encounters for a particular core chief complaint, core diagnosis, or setting should notify the Course Director by the end of the third week of the course to ensure that these experiences can be arranged.

*Assessments including narrative components; additionally, the MSPE paragraphs are narrative summaries of student performance in the course.

Grading System

Each score from the table above is converted to a score between 0-4, where 2.0 represents the minimum passing score and 4.0 is the maximum score. The final overall numerical course score is the weighted average of each score from the table above. Final overall course scores are rounded to one decimal point using standard rounding (e.g. 3.49 = 3.5).

Students will receive final letter grades of HONORS (H), HIGH PASS (HP), PASS (P), or FAIL (F).

HONORS: A student who earns a final numerical course score of 3.5 or greater, passes each of the Must Pass elements on the clerkship on the first attempt, and completes all of the Must Complete elements will earn a grade of HONORS for the course.

HIGH PASS: A student who earns a final numerical course score of 3.0, passes each of the Must Pass elements on the clerkship on the first attempt, and completes all of the Must Complete elements will be assigned a grade of HIGH PASS for the course.

PASS: A student who earns a final numerical course score of 2.0 or greater, passes each of the Must Pass elements, and completes all of the Must Complete elements will be assigned a grade of PASS for the course.

FAIL: A student who earns a final numerical course score of less than 2.0 and/or fails one or more Must Pass elements of the clerkship and/or fails to complete all of the Must Complete elements will be assigned a grade of FAIL for the course.

Preceptor Evaluations

All Phase 4 Courses employ a common preceptor evaluation form that instructs evaluators to select performance-based behaviors along multiple dimensions that best represent the student’s highest sustained performance during the preceptor’s period of observation. The preceptor evaluations are must pass elements of the course. The passing student must achieve an overall score of 2.0 for the preceptor evaluations. A student who does not achieve a passing score for the preceptor evaluation component will receive a grade of FAIL for the course.

Mid-Course Formative Feedback

All Phase 4 Courses employ a common mid-course formative feedback form that includes both a student self-assessment and faculty/resident assessment of student section. This self-assessment and feedback is intended to be formative in nature and will not be used in the calculation of preceptor evaluation data for final grade determination. Students will be instructed on the process of self-assessment and formative feedback and will be responsible for timely completion and submission of the data to the Course Director according to individual course specified process for selection of preceptors and occurrence frequency. Students with formative feedback suggesting need for remediation should contact the Course Director to develop a learning plan.
Student Feedback
Providing feedback is an important aspect of our professionalism expectations, and helps with curriculum quality improvement. For each clinical course in Phases 3-4 you must complete an end-of-course survey and individual surveys of clinical faculty and residents by the due date to demonstrate reliability for the professionalism competency. Required surveys are administered online through Qualtrics and student responses are anonymous. Please refer to the resource section of the course canvas page for student feedback survey due dates.

Standard Practices
Please refer to the Clinical Curriculum Procedures and Practices for the following:
- Phase 4 Developmental Benchmarks for Priority EPAs
- Phase 4 Formative Feedback Form
- Phase 4 Global Rating Form (Preceptor Evaluation)
- Phase 4 Attendance Expectations
- Medical Student Clinical and Educational Work (formerly Duty Hours)
- Medical Student Clinical Documentation
- Medical Student Call Rooms
- Medical Student Mobile Communication
- Students as Interpreters

Standard Policies
Please refer to the Student Handbook (on the Student Affair’s website) for these policies:
- Accommodations
- Addressing Sexual Misconduct
- Dress Code
- Examination and Grading Policies
- Grade or Score Appeal
- Professionalism, Roles & Responsibilities
- Mistreatment
- Infectious, Environmental and Bloodborne Pathogen Exposures Policy

Alternate Name and/or Personal Pronoun
Class rosters are provided to the instructor with the student’s legal name as well as ‘Preferred’ first name (if previously entered by you in the Student Profile section of your CIS account). While CIS refers to this as merely a preference, we will honor you by referring to you with the name and pronoun that feels best for you in class, on papers, exams, group projects, etc. Please advise us of any name or pronoun changes (and please update CIS) so we can help create a learning environment in which you, your name, and your pronoun will be respected.

Center for Disability & Access
The School of Medicine seeks to provide equal access to its programs, services and activities for all medical students. The Center for Disability and Access (CDA) provides accommodations and support for the educational development of medical students with disabilities. Medical students with a documented disability, and students seeking to establish the existence of a disability, that would like to request accommodations are required to meet with the CDA to establish accommodations. The CDA will work closely with eligible students and the Academic Success Program to make arrangements for approved accommodations. The School of Medicine and CDA maintain a collegial, cooperative, and collaborative relationship to ensure compliance with federal and state regulations for students with disabilities.

Steven Baumann EdD, School of Medicine Senior Director of Academic Success Program, serves as the liaison between the School Of Medicine and the CDA.

Contact Information:
Dr. Steven Baumann, Senior Director of Academic Success Program
Safety Statement
The University of Utah values the safety of all campus community members. To report suspicious activity or to request a courtesy escort, call campus police at 801-585-COPS (801-585-2677). You will receive important emergency alerts and safety messages regarding campus safety via text message. For more information regarding safety and to view available training resources, including helpful videos, visit safe.utah.edu.
